TISCH MS
RESEARCH CENTER OF NEW YORK

**Proceeds from *Take a Swing at MS Golf Outing* directly support
Tisch Multiple Sclerosis Research Center
of NY's
FDA-approved Phase II stem cell trial**

For more than a decade the Tisch MS Research Center of NY, a center founded for the purpose of discovering the cause and cure for multiple sclerosis, has been setting the standard for excellence in research. In 2016, Dr. Saud A. Sadiq and his research team announced landmark results of their FDA-approved Phase I Stem Cell Trial, establishing safety and tolerability, as well as reversing disability in some patients. Given the remarkable Phase I trial results, the FDA approved the Tisch team to begin Phase II to establish efficacy, the first trial to reach this stage in the United States.

Now, in 2017 the Center is constructing a state-of-the-art Stem Cell Lab with plans to begin the Phase II trial later this summer. **The prompt initiation and successful completion of this trial will make the long-awaited dream, a treatment to reverse disability, a reality.**

We thank you for your generous support!
